STATEMENT OF SUPPORT for the Registered Nurses at Tacoma General Hospital

The Registered Nurses at Tacoma General Hospital are engaged in a struggle to ensure safe patient care. They are fighting at the bargaining table to make sure Registered Nurses have what they need to give the safe, high quality care their community of patients should be able to expect. They are fighting in the courts to ensure nurses get their much-needed and legally-mandated rest breaks.

Given that:

- Registered Nurses at Tacoma General logged more than 18,000 missed rest breaks in the first quarter of 2016.
- Registered Nurses at Tacoma General filed more than 750 complaints in the last six months over work assignments they considered unsafe for their patients.
- MultiCare Tacoma General is defying a legal order requiring it to provide rest break relief.
- MultiCare Tacoma General is making profits of approximately \$177,000 per day, adding up to \$65 million per year.

As members of this community, we call on MultiCare Tacoma General to respect their nurses and bargain in good faith to ensure that patients at Tacoma General get the safe, high quality care they deserve.
